

Gateway Community Church

We moved into this facility 4 years ago, the auditorium seats about 1900. We have 3 identical services at: 9:30, 11:00 and 12:30, plus an evening service called Deepen at 5PM.

Our lighting is all ETC with a 96 channel ETC board and 24 sub masters. Most of our instruments are 750 watt ellipsoidals.

Our Sound board is a Soundcraft 48 mixer.

Switching is done on a Broadcast Pix switcher which was purchased 2 years ago. We run our graphics and slides on Macs using Pro Presenter.

Our Video department shoots all projects on Panasonic HVX 200 and edits on Final Cut Suite applications. Justin Girdler will answer video questions.

We use a service called "Planning Center Online" to plan our services and schedule people for the bands and live production.

We have a satellite campus in South Austin in Covington Middle School. They do their own music, and receive the message from here via a fiber optic link to the server. We are using Sage TV software and a DVR to record and play the message at South campus.

We just started our live internet campus. I'll let Vince Marotte fill you in on that aspect of our ministry.

McNeil Inspire Service

Know Your Enemy - John
